

The Harmony ClearLift™ laser treatment rejuvenates mature skin, enhancing your natural beauty and revealing smoother, younger, healthier-looking skin. It is an ideal treatment for: wrinkles, fine lines, photodamage, uneven skin tone and skin laxity, and is safe for all skin types.

While most laser procedures produce a thermal effect to stimulate collagen renewal, Harmony ClearLift™ uses a specially designed fractional Q-Switched laser to achieve a deep mechanical effect, focusing the energy beneath the epidermis.

The treatment is based upon a unique method of energy dispersion, emitting narrow pulse widths with multiple peaks of energy, resulting in more effective treatment and increased patient comfort. This creates a controlled dermal wound while leaving the epidermis intact.

The wound healing process stimulates growth of new collagen as well as contracture and tightening of the tissue.

Harmony ClearLift™ treatments are effective, reliable and have a first-rate safety record, proven in extensive clinical studies.

Harmony ClearLift™

The Lunchtime Face Lift

Rediscover your natural beauty with optimal results.

Harmony ClearLift™ is the most comprehensive Q-Switched Nd:YAG treatment solution available today. A single laser module treats three separate indications for all skin types, with new and unique technological innovations for each indication.

Maximal Power

The high power non-ablative Q-Switched Nd:YAG 1,064nm laser and KTP adaptor, which doubles the laser frequency to 532nm, features a unique double rod laser configuration, which maximises energy production for greater treatment efficiency.

Optimal Results

The treatment is based on a unique method of energy dispersion, emitting narrow pulse widths with multiple peaks of energy, resulting in more effective treatment and increased patient comfort.

Harmony ClearLift™ delivers photo acoustic shockwaves to the target area through high laser intensities in nanosecond pulses. This mechanical Q-Switched effect creates a controlled dermal wound - a unique mechanism of action that achieves optimal results for each indication.

The treatment is powerful enough to address challenging skin imperfections, hyperpigmentation and multicoloured tattoos, while gentle enough to treat the most delicate areas of the face, neck and décolleté.

Harmony ClearLift™ stops the ageing clock from head-to-toe, with a wide variety of treatment solutions customised to your specific needs as they change over time. Treatments are virtually painless with minimal downtime, so there is no need for pre-treatment anaesthetics.

Exeter Medical welcomes the new Harmony ClearLift™ laser treatment, also known as 'The Lunchtime Face Lift' – the most comprehensive Q-Switched Nd:YAG treatment solution available today.
